

Protecting Your Digital Assets™

CRU

# CRU Product Families

CRU is a pioneer in data security and data mobility devices.

## CRU DataPort® & CRU Data Express®

Single-bay removable hard drive enclosures for 2.5" and 3.5" drives

- Rugged All Metal to Cost-Effective All Plastic Designs
- Hardware Based 256-bit AES Encryption
- Hot Swappable
- SATA, SAS, SCSI, and IDE Interface Bridges
- 6Gb/s SAS/SATA Models
- Multi-drive Bay Options

Data Express.

Applications: Data Security, Mobile and Rugged Storage, D2D Backup, Disaster Recovery

Core Markets: Government, Education, SMB, Digital Cinema, Video Security, Post Production

## CRU RTX™

Tower enclosures ranging from 1 to 8 bays of removable storage designed for easy transportation of large data sets or RAID's.

- Multiple Bay Options: TrayFree™, DataPort 10, Data Express 115
- Hardware Based 256-bit AES Encryption
- RAID 0, 1, 0+1, 3, 5, 6, JBOD
- eSATA, FW800/400, USB 3.0/2.0, SCSI, iSCSI, Multilane (6Gb/s available)

Applications: D2D Backup, Digital Media,

Data Security, Archiving, Portable Data RAID

Core Markets: SMB, Government, Photography,

Forensics, Apple, SOHO

## CRU RAX™

1U, 2U and 4U rackmount enclosures with several options for removable drive bay options, RAID configurations and host interface options.

- Multiple Bay Options: TrayFree™, DataPort 10, Data Express 115
- Hardware Based 256-bit AES Encryption
- RAID 0, 1, JBOD
- eSATA, FW800/400, USB, Port Multiplied eSATA, Multilane (6Gb/s available)

Applications: D2D Backup, Digital Media, Surveillance Backup, Data Security, Disaster Recovery

Core Markets: IT Professionals, SMB, Digital Cinema, Government, Apple

## CRU ToughTech™

Aluminum constructed external drive enclosures for 2.5" and 3.5" hard drives. All ToughTech products feature leading edge thermal design eliminating the need for fans.

- WriteProtect™ and WriteLock™ Technology
- Hardware Based 256-bit AES Encryption
- 2-Drive Handheld RAID
- eSATA, FW800/400, USB 3.0/2.0
- Bus-Powered Versions

TOUGHTECH™

Applications: Digital Media, Data Security, Mobile and Rugged storage, D2D Backup

Core Markets: Photography, Apple, Education, Mobile Professionals, SOHO

## CRU WiebeTech™

wiebeteCH™  
A Brand of CRU-DataPort

Forensic and eDiscovery solutions for digital data capture and duplication in the field and laboratory.

- Write-Blocking Technology
- Drive Imaging
- Drive Erasing
- HPA/DCO Detection
- Write-Blocking Technology – SATA, PATA, USB, SCSI, SAS, Media Card
- Hot Plug
- Mouse Jiggler

Applications: Forensics, eDiscovery, Corporate Security, Data Acquisition

Core Markets: Government, IT and Security Professionals

## CRU DataHarbor™

CRU DataHarbor: simple, secure backup and recovery. Protecting your company's PCs, Macs, and shared data is smooth sailing with the CRU DataHarbor network backup appliance. Built-in hardware encryption, industry-proven CRU-DataPort removable drive carriers, and Microsoft Windows Storage Server Essentials software combine for a secure onsite/offsite backup and recovery appliance that's a breeze to deploy and maintain.

- Everything you need to protect your data in one package
- Supports 3 installation types: horizontal, vertical, rack-mounted
- 256-bit Hardware Encryption (FIPS 140-2)
- Pre-installed with Microsoft Storage Server Essentials 2008 R2
- Allows configurations to include network files share space
- Remote monitoring with email/text notification
- Drive carriers available for additional off-site rotation

Applications: Network Backup, Disaster Recovery, Small Business Data Security
